Technical Specifications:

Barcode	EAN: 8034108892474
Quantity	500 ml
Confection	12 Pz.
Aspect	Plastic flacon anti-UV with trigger
Color	Light yellow
Odour	Characteristic of solvent
Relative density	a 20°C 1,18 ÷ 1,22 g/ml
Yield	5 ÷ 10 mq/l variable on the basis of area
PH	12,50 ± 0,15
Dry residual	a 105 °C - 14,00 ± 0,5 %
Viscosità	0,002 Pas a 20 °C
Partition coefficient	0,3
Vapor pressure	20 hPa a 20°C
Melting temperature	-20 -30 °C

HOW TO USE Work in adequately ventilated area. Shake well before use. In order to clean the surfaces we recommend brushing the most infested areas by removing the most significant parts. Spray the preparation from a distance of 10 ÷ 20 cm. Wait 20/30 minutes so that it can act and if, when dry you still notice the stains, spray again. Brush off the area to remove the last traces of any stains that formed solid residues caused by the drying product itself. In case you want to proceed with the painting of the wall, it is recommended to apply two or more coats of paint and then employ a specific anti-mold paint. In this way the prevention will work longer and be more effective.

MODALITY OF STORAGE

Before using: stock the product in a dry location and don't stock it with a temperature under 5° degrees and over 35°C, after the use, keep containers closed. In the original package, the product can be conserved for 24 months.
